SUPRATILE CLEANING AND MAINTENANCE INSTRUCTIONS

Supratile is manufactured from an easy to maintain PVC polymer compound and can be cleaned with any common household cleaners. Do NOT use any cleaner with abrasives (like Comet or Soft Scrub), or anything that contains bleach.

Cleaners that have worked will are Simple Green, Spic & Span, and Purple Power amongst many others. We do not recommend waxing the tiles. A stiff bristle type broom also works very well to remove dirt and such from the tiles.

SupraTile also offers a small Scuff Remover Kit which works very well to assist in removing stubborn spot marks and scuffs. See website for info or contact our office.
