POWER TROWELED	NONE	SQUIRE	NCO	Tensile strength testing - Water beading

INTERIOR/EXTERIOR FLOOR COATINGS

COMMERCIAL & RESIDENTIAL

THE ULTIMATE PROTECTIVE SEALER

SILICON-CERAMIC COATING DESIGNED TO PROVIDE MAX PROTECTION AGAINST MICROBIAL GROWTH, STAINS & FADING FROM UV EXPOSURE

ABOUT BALLISTIX :

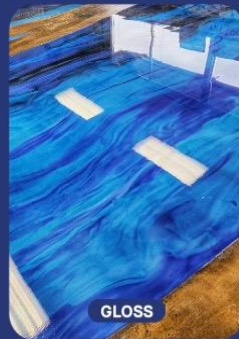

During these times of COVID-19 where safety is key, it is important to maintain a high standard of cleanliness. Ballistix Squire is the most environmental friendly, technologically advanced interior coating on the market that not only restores and beautifies, but protects floors against microbial growth. Ballistix Squire is unique in the sense that it actually grows a thin layer of glass on top of the surface, making it impervious to chemicals and staining. This allows for easier cleaning, and with longer duration between recoating, you will save money in the long run. Unlike cheap water-based sealers used by most other sealing companies, our Ballistix Squire will seal your floors for YEARS to come!

MATTE

SATIN

GLOSS
